

**Linux, By Definition:**

Linux (/ˈlɪnəks/ (listen) LIN-əks) is a family of free and open-source software operating systems based on the Linux kernel, an operating system kernel first released on September 17, 1991 by Linus Torvalds. Linux is typically packaged in a Linux distribution (or distro for short).

-Wikipedia

The above definition is probably not going to help you much if you don't know what an Operating system is, and what this UNIX thing is, so let's start at the first major point: What is an Operating system? I promise I won't make it boring!
